

7 electronics to unplug during a storm.

As we move even further into the digital age, our homes tend to fill with even more electronics. More often than not, these electronics are costly. They'd be difficult to replace. And damage to the device could end up causing damage to your home. That's why we recommend you unplug during a storm.

When bad weather is on its way, unplug your:

- TV
- DVD player
- Gaming console
- Computer
- Treadmill
- Printer
- Stereo

Then, once the storm passes, continue to leave everything unplugged for 15 to 20 minutes.
